

Urban Farm Paid College Internship

Grow It Green Morristown is seeking a reliable, hands-on, Farm Hand to assist with the cultivation of produce and community at the Urban Farm. The area of our farm is approximately one acre. The farm practices follow regenerative agriculture practices and integrative pest management recommendations and emphasize overall sustainability, but we are not certified organic.

Beyond being a farm, The Urban Farm is an educational center for the community and the 5200 children of the Morris School District. The Farm Hand will play an important role assisting with the production and distribution of produce to our surrounding community. This will require self-confidence and a professional attitude, as well as being able to deal with a variety of diverse groups.

The Urban Farm Interns will be responsible for assisting in food production, soil management, harvesting and helping coordinate the distribution of produce to Grow It Green Morristown's various partners. Interns should desire to learn more about growing food and stewardship of land, as well as have a desire to work with the public. We are a community oriented nonprofit, as such we expect the intern to help with programs and events.

Duties include:

Hands on physical labor

1. Basic care, feeding, and tending of a large-scale vegetable garden
2. Using farm tools such as pruners, wheelbarrows, weeders, etc.
3. Must be able to lift heavy loads (such as soil, compost, rocks, etc.)

A mature, positive attitude

1. Dependable, organized, flexible and have a sense of humor
2. Can be flexible due to weather constraints (i.e. heavy rain one day may change the work schedule)
3. Must be personable, enjoy working with all kinds of people, including children and our diverse community members
4. Work as a member of a team
5. A strong work ethic and the ability to work independently, with minimal oversight

Other considerations

1. Must be a student enrolled in high school, or have just completed your senior year
2. Work can sometimes be off-site, at our community garden or Greenhouse
3. Spanish fluency is a plus

Job Schedule

The internship runs from May through August. Our farm is open from Tuesday through Saturday. During the internship, an intern can work Tuesdays through Friday from 8am to 5pm and Saturdays (9 a.m. to 2 p.m.) each week. The internship pays \$15/hr and can work up to 20hrs a week. This is a flexible work environment, and a work schedule can be set after internship is awarded and discussed during interview.

This position is an outdoor job and requires the ability to work in a variety of weather conditions, including very hot, very rainy, and humid weather. On days where outdoor work is impossible due to severe weather, we will reschedule work hours for a different day of the week.

Apply with your resume/ CV and cover letter to jobs@growitgreenmorrystown.org. In your email, please include your availability and work history. Interviews will be conducted by Farmer Shaun at Grow It Green Morrystown.
